## DETAILED ACTION

### *Preliminary Amendment Status*

1. Acknowledgment is made of entry of Preliminary Amendment A, filed 2/23/00.

### *Priority*

2. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 08/478,688, filed on 6/7/95.

3. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### *Claim Rejections - 35 USC § 112*

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 11-36 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a refractive of 1.49171, does not reasonably provide enablement for all refractive index greater than 1, specifically for refractive index below 1.4971 to 1, and refractive index above 1.4971 to infinity as defined by the claims' (1, 17 and 23) scope. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly

connected, to make or use the invention commensurate in scope with these claims. Applicant can overcome this rejection by claiming the range or value which is explicitly enable by the specification.
